

CASE STUDY - WINDOW ENCAPSULATION

LEADERS OF THE UNSEEN

Problem:

A customer who is involved in window encapsulation is in the middle of a process of changing from solvent-based to water-based products. He needs a product that suits his needs and provides him with a flawless piece finish and minimum dirtying.

Solution:

Concentrol's technical laboratory in China worked with great speed and agility, managing to respond to the customer's requirements. With Concentrol's water-based release agent a considerable improvement in production is achieved. The new formula achieves a defect-free finish and uniform texture, and reduces the dirtying characteristic of the packaging industry.

Result:

SMOOTH FINISH
WITHOUT DEFECTS

LONGER CLEANING CYCLES

EFFICIENCY IMPROVEMENT
