

Optimization of mould release agents from their application and throughout the entire process in order to reduce waste

RELEASE AGENTS:

- Organic solvent based release agent
- Hybrid release agent (solvent 20-50%) and Co-Solvent (<20)
- Water Based Release Agent

PROBLEM:

- Bad application
- Misuse during the process
- Environmental and safety factors

Solutions presented at UTECH Las Américas:

- Tips for a good dilution
- Advice on transport of release agents
- Correct use of the application equipment
- Current situation of tin components in release agents and removal of tin components in release agents
